## Born to roam

On board 73 metre Planet Nine

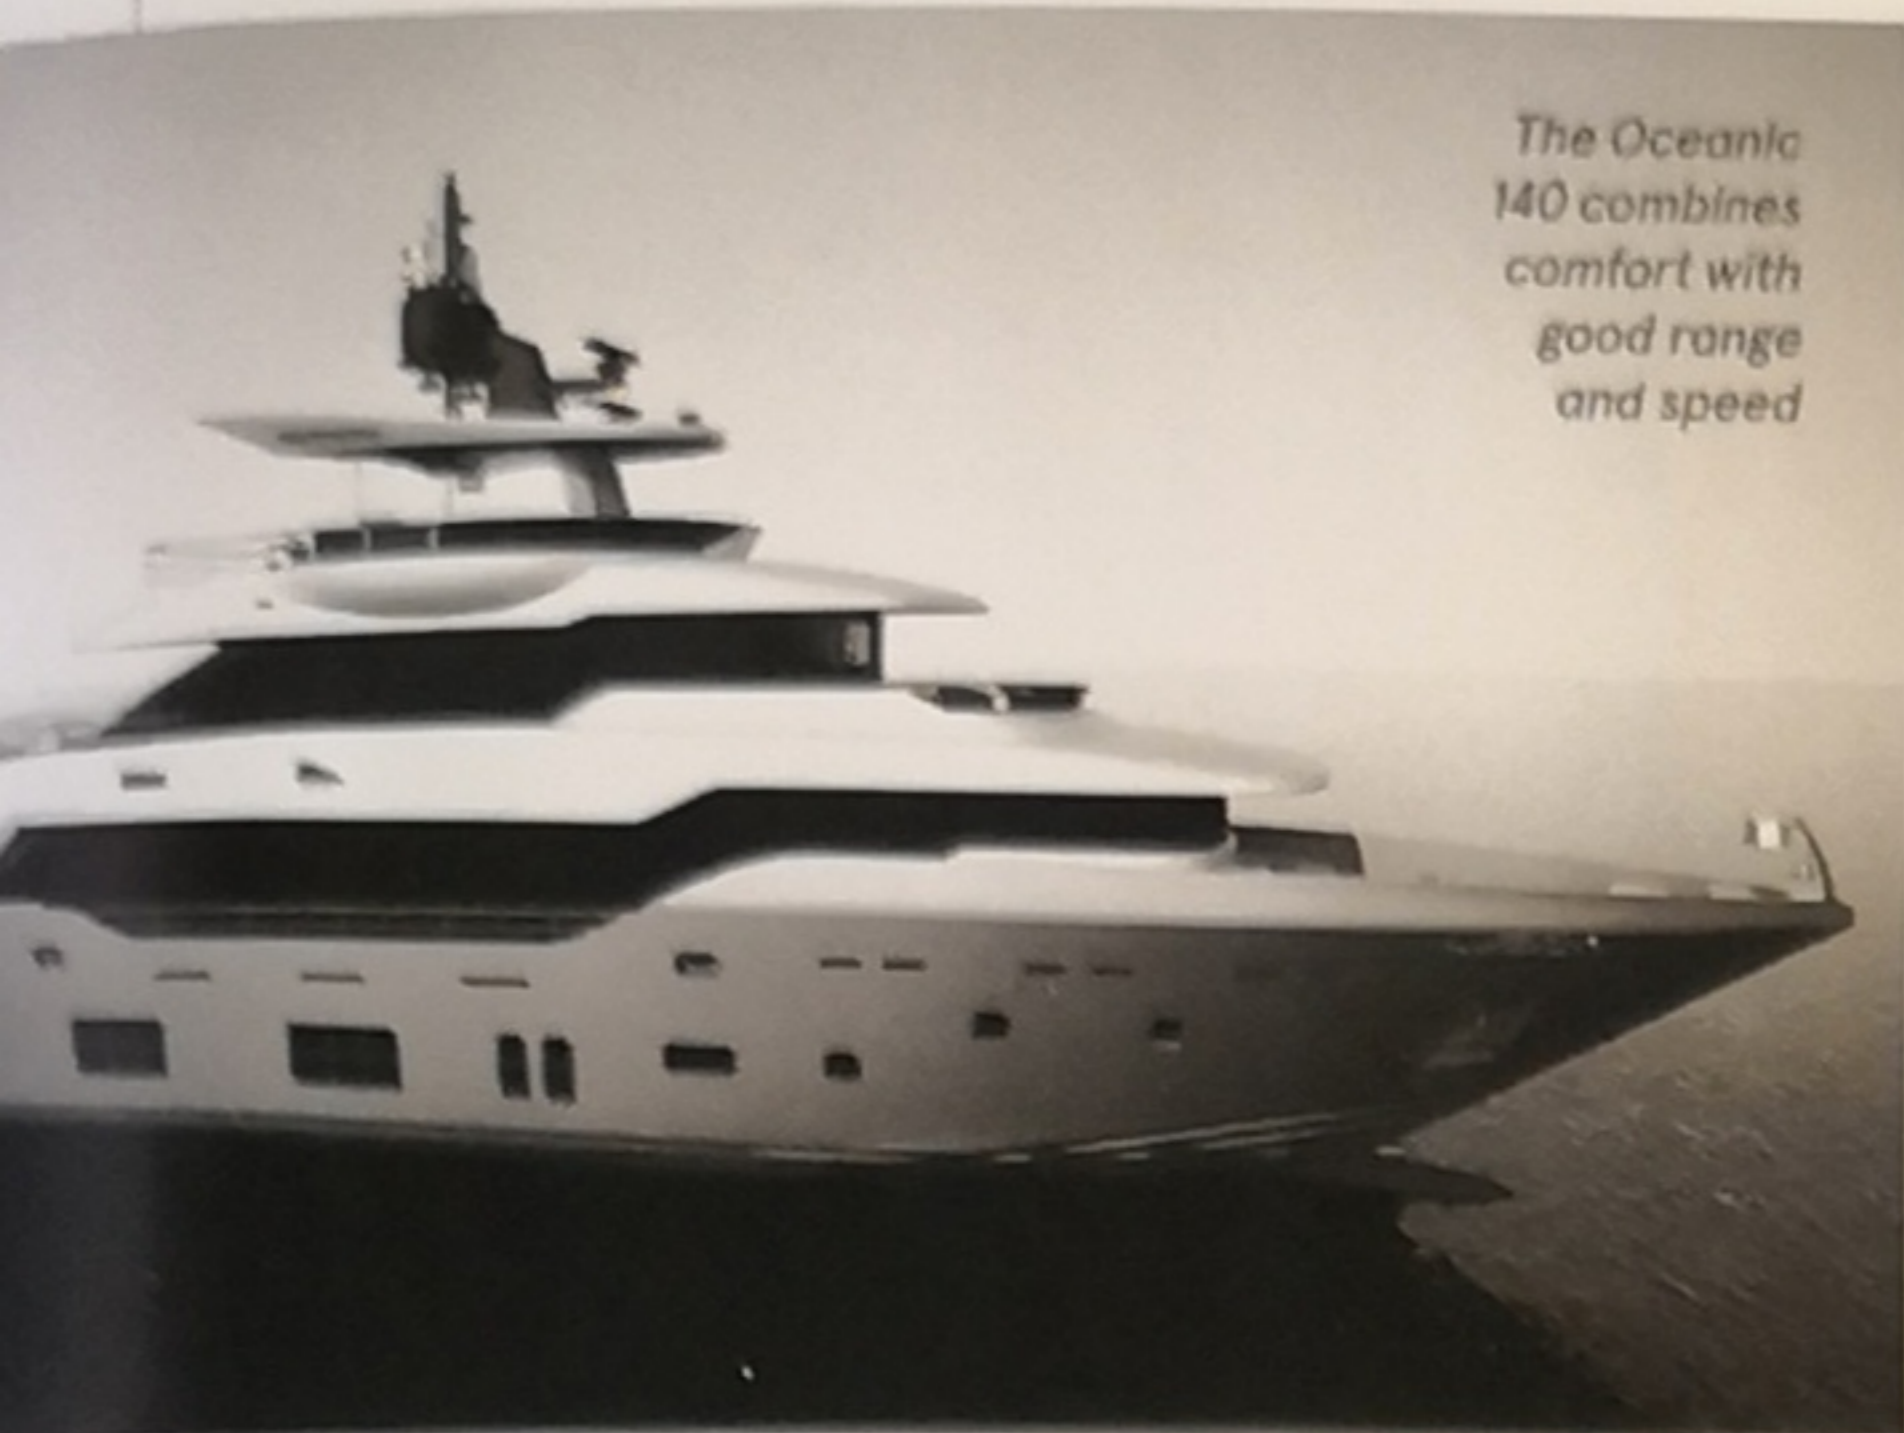

REVVED UP *The world's biggest expedition yacht will blow your mind*

BEACHED AND BATTERED *Who will save Blue Gold?*

EXPLORING THE MIDDLE EAST

## OCEANIC 140

The Oceanic 140 combines comfort with good range and speed

This explorer has a twin-stepped GRP hull that can hit 27 knots in planing mode or cruise in displacement mode at 7.5 knots, and boasts a range of 4,900nm. Diesel-electric pod propulsion means that the engine room is under the large aft deck and the tender garage amidships, buffering guest cabins from noise. Owners have a private deck with an outdoor spa.

2020

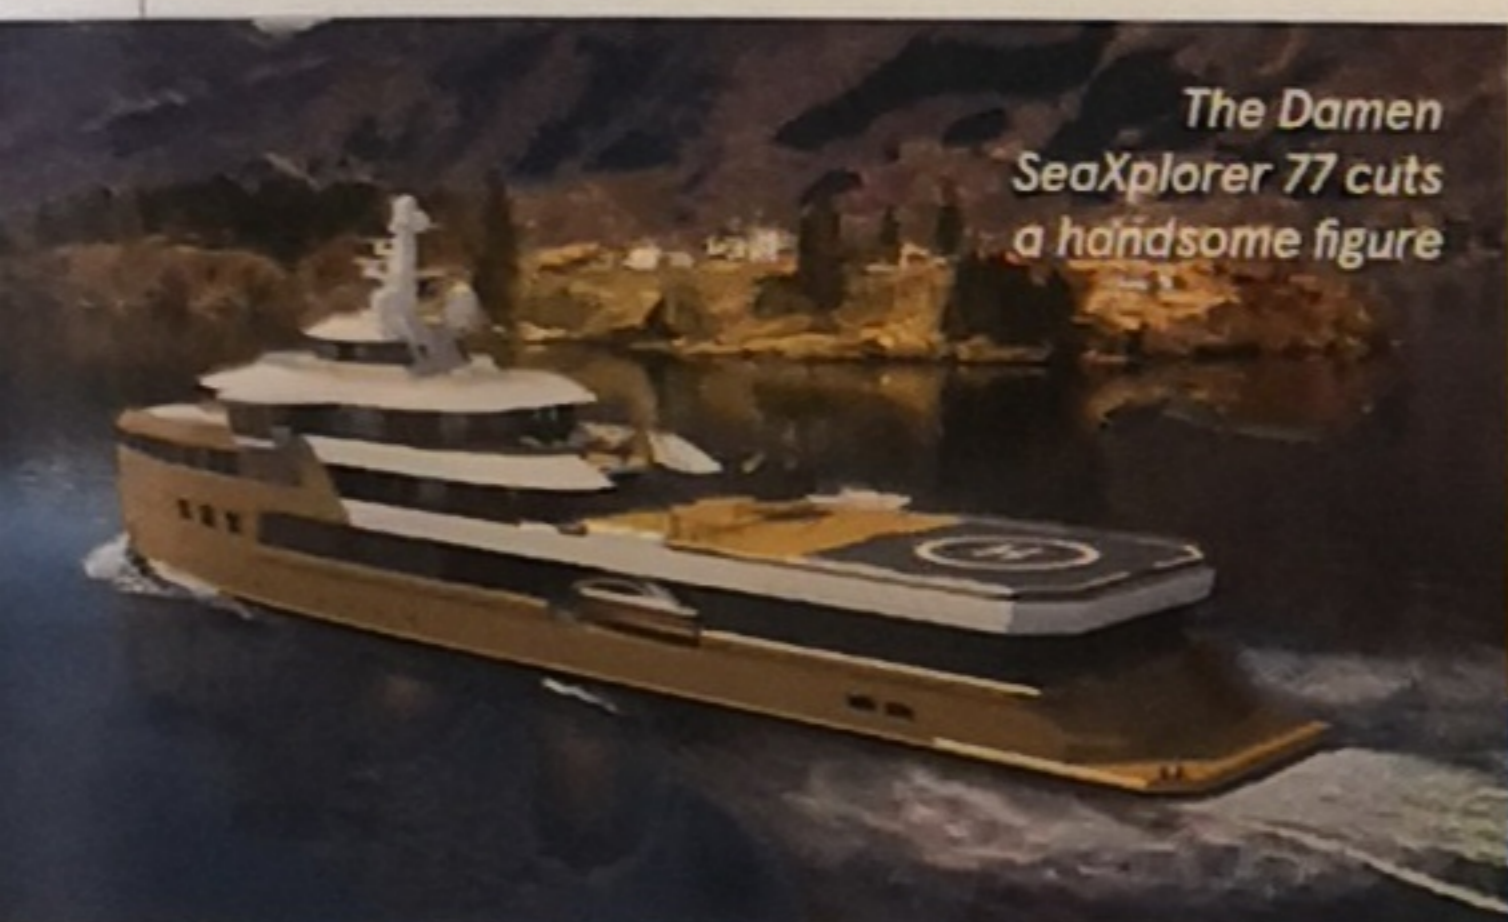

This cleverly designed vessel is robustly built with impeccably stylish interiors

## M40

### DETAILS

builder  
CBI Navi  
LOA  
39.67m  
due  
2018

The CBI Navi M40 is the second collaboration between this Italian shipyard and naval architect Hydro Tec for the same client. Already familiar with explorer yachts, this owner wanted to focus on details like wine cellar location and workbench layout. The sturdy high volume yacht also has interiors by Fossati Design Bureau.

The Damen SeaXplorer 77 cuts a handsome figure

# BREAK THE WAVES

Clare Mahon picks the toughest and coolest ice-cracking expedition yachts in build right now

### DETAILS

Cool, very cool. Cold, in fact – this is what the Damen SeaXplorer line is designed for. Engineered to comply with the International Maritime

Organization Polar Code category B guidelines, the yachts have heavy ice Polar Class reinforcement and systems designed to function even in the severest climates. Eco-friendly to respect very fragile environments, they come with 40 days' autonomy in full luxury mode.

## SEAXPLORER 65 AND 77

Icy polar seascapes are the SeaXplorer 77's natural habitat
